

B¹
encl. SCR-2 based on the amino acid residue present in corresponding
SCR, as described in Examples 2 and 3 and Table 2.

Page 12, deleted lines 10 and 11.

Page 14, lines 12 and 14, delete "in Figure 2B".

Page 29, line 25, insert --Figures 2A and 2B and--
after "forth in".

Page 30, line 23, delete "support".

Page 36, line 13, insert --as shown in Figures 2A and
2B and Figures 3A and 3B-- after "substitutions".

In the Claims

B² Sub C3
1. (amended) An analog of a protein regulating
complement activation having short consensus repeats of amino
acid sequence selected from the group consisting of complement
receptor 1, complement receptor 2, decay accelerating factor,
membrane cofactor protein, C4 binding protein, and factor H, and
[these] those complement regulating proteins wherein the carboxy
terminus is removed to allow the protein to be secreted, wherein
said protein analog is selected from the group consisting of
complement regulating proteins containing short consensus repeats
derived from a second, different complement regulating protein,
complement regulating proteins wherein the short consensus
repeats are rearranged, complement regulating proteins having
defined amino acid substitutions in the short consensus repeats
